# Dedication of Intent (Gatha)

The unsurpassed, profound and intricate dharma is difficult to encounter, even over hundreds and thousands of kalpas.

Now that I have seen and heard the dharma.  
I behold and uphold what the dharma offers.  
I wish to understand the true meaning of  
Tathagata

# Key concepts

- ❖ Science is about falsifiability testing through measurement. Therefore, abstract concept need to be quantified by scientific methods.
- ❖ Kinesiological technique is used to quantify consciousness.
- ❖ Quantification is important because it brings the metaphysical into physical realm.

POWER ↑

↑ STRONG

↓ FORCE

↓ WEAK

**POWER** is self-sustaining, permanent, stationary, and invincible.  
**FORCE** is temporary, consumes energy, and moves from location to location.

Logarithmic Energy Field Increases: 1 = 1; 2 = 10; 3 = 100; 4 = 1,000; 5 = 10,000; 6 = 100,000 ...etc. 4

All levels below 500 are "objective" and all levels from 500 to 1000 are "subjective."

# Scientific views

- ❖ The law of conservation of energy states that the total energy of an isolated system is **constant**; energy can be transformed from one form to another, but can be **neither created nor destroyed**.
- ❖ **Energy = Power = constant = natural**
- ❖ **Tathagata = coming and going = metaphysical to physical realm.**

# Levels of consciousness

- **Mirror effect: the way we see the bum is a reflection of seeing our own self.**
- **The bum was observed through our 6 senses (i.e. dirty, smelly or harmful).**
- **The 5 aggregates influence the perception of the bum (i.e. poor, unfriendly, dirty old bum).**
- **We should observe the bum from our 8<sup>th</sup> sense, our soul, outwardly.**
- **Observer creates the observed.**

# Levels of consciousness

- **What is the meaning of life? Consciousness created (life) a miracle of grand design for it to perceive itself. Each human should become AWARE of this purpose. Did consciousness create the universe?**
- **Consciousness levels are thinking boxes.**
- **The table of consciousness levels represents a continuum scale.**
- **Each level of consciousness defines its own limited capacity of perception and comprehension.**

# Levels of consciousness

- **People at higher level always understand people at lower levels.**
- **People at lower level cannot understand the people at higher level.**
- **It is the responsibility of people at higher levels to pull the population at lower levels up.**
- **Also, collective consciousness at lower level tries to pull down the people at the higher levels.**
- **Therefore, each level constitutes an energy field, which tries to attract the next higher level back down to their level and try to attract the one level below to go up.**

# Levels of consciousness

- **It is always an attraction of adjacent levels.**
- **In one life time, an individual can only advance upwards to the most by a log scale measurement of 5 units only. We can regress easily, but it is difficult to advance.**
- **Consciousness levels can be elevated through action.**
- **The desire and the willingness of conscious progress from doing nothing to doing something (action) will help to elevate the consciousness level.**

# Levels of consciousness

- **Enlightenment is the passion to put value into one's life.**
- **Level 200 is the critical response point which is associated with integrity and courage. Below level 200, the kinetic response goes negative (force → destructive). Above level 200, the kinetic response goes positive (power → constructive).**
- **Below 200, the primary impetus (motivation) is personal survival, (self)**
- **At the very bottom of the scale, the zone of hopelessness and depression, even this survival motive is lacking.**

# Levels of consciousness

- Above 200, the well being of others becomes increasingly important. (Selfless)
- At level 250, meaningful human satisfaction begins. Some degree of self confidence begins to emerge as a basis for positive life experiences in the evolution of consciousness.
- At level 500, the happiness of others emerges as the essential motivating power.
- The high 500 level is characterized by interest in spiritual awareness of both oneself and others.
- At level 600 the good of mankind and the search for enlightenment are the primary goal.
- From 700 → 1000, life is dedicated to the salvation of all of humanity.

# Collective distribution

- **85 % of human race calibrates below the critical level of 200.**
- **The collective consciousness of mankind was at level 190 for many centuries.**
- **Overall average level of human consciousness from 1990's to today is approximately 207.**
- **Only 4 percent of world's population calibrates at level 500 or above.**
- **Only 0.4 percent reach level 540.**
- **Only 1 in a 10 million reaches level 600 and above.**

# Levels of consciousness

- **Level 700: the concept that all men are created equal by virtue of the divinity of their creation, and human rights are intrinsic to human creation and therefore inalienable.**
- **The Constitution of United States calibrates at level 700.**
- **Mahatma Gandhi calibrates at level 700.**
- **At level 1000 : Only Krishna, Buddha, Jesus.**

# Levels of consciousness

- **These calibrating levels are in log scale**
- **One individual at level 300 counter balances 90,000 individuals below level 200.**
- **One individual at level 400 counterbalances 400,000 individuals below level 200.**
- **One individual at level 500 counterbalances 750,000 individuals below level 200.**
- **One individual at level 600 counterbalances 10,000,000 individuals below level 200.**
- **One individual at level 700 counterbalances 70,000,000 individuals below level 200.**
- **Twelve individuals at level 700 equals one avatar at level 1000**
- **In 1995, there were 12 persons in this planet calibrating at 700.**
